CAREER OBJECTIVE

Recently graduated with a BSc in Information Technology (Computer Science and Informatics, University of Johannesburg, 2025). Strong full-stack engineering foundation — React, Next.js, ASP.NET Core, SQL — with hands-on experience building and shipping end-to-end systems. Comfortable operating in fast-paced environments and collaborating with cross-functional teams to transform business requirements into clean, maintainable technical solutions. Actively growing skills in cloud infrastructure and backend architecture, with a long-term focus on cloud engineering.

EDUCATION

BSc Information Technology | University of Johannesburg | Jan 2022 – Nov 2025

- Majored in Computer Science and Informatics
- Relevant coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Object-Oriented Programming, Information Systems

National Senior Certificate | Bracken High School | Jan 2017 – Dec 2021

- Top Matric Learner in Computer Applications Technology (83%)
- RCL Prefect and Student Leader

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript, C#, C++, SQL, Python(foundational)
- **Frontend:** React, Next.js, Tailwind CSS, HTML, CSS
- **Backend:** ASP.NET Core Web API, RESTful APIs, Node.js, WCF(SOAP Based), API integration
- **Databases:** Microsoft SQL Server, Azure SQL, PostgreSQL, MongoDB — design, queries, indexing, relational modelling
- **Software Development:** Object-oriented programming, data structures & algorithms, clean architecture, testing & debugging, system design, authentication flows
- **Cloud & Infrastructure:** Microsoft Azure, Docker, AWS (foundational)
- **UI/UX & Design:** Figma, Draw.io, Adobe Photoshop, Adobe Illustrator, Framer
- **Version Control & Communication:** Git, GitHub, Trello

SELECTED PROJECTS & WORK

ZENBOX – Project Management System – Full Stack Developer 2025

- Core member in a team of 4; analysed client workflow challenges and design a full-stack project management solution; delivered as final-year project.
- Built end-to-end: role-based access control, client onboarding, real-time task tracking, automated PDF reporting, audit logging, and automated email notifications
- Applied clean architecture principles (layered backend, REST API, component-based frontend) ensuring maintainability and scalability
- **Tech Stack:** ASP.NET Core Web API(C#), React Native (Expo, TypeScript, Tailwind CSS), Azure SQL
- **Demo:** youtube.com/watch?v=L-LNjbStd80 | xabiso.vercel.app/#projects

JOBTRACKr – Smart Job Application Dashboard – Full Stack Developer 2025

- Designed and built a web application from scratch to help job seekers organise, track, and analyse applications — end-to-end

- Implemented Gmail auto-sync for automated email ingestion, Google OAuth and OTP secure login, JW Tokens and a responsive analytics dashboard with performance metrics
- Demonstrates full product ownership: system design, backend API, database modelling, and frontend — all delivered independently
- **Tech Stack:** Next.js, MongoDB, REST API, TypeScript

WORK EXPERIENCE

Call Centre Agent | Mbungela Consulting (MiWay Life Insurance) | *Feb 2024 – Apr 2024*

- Gained sales experience making cold calls and promoting MiWay Life products — built strong communication and customer relationship skills fast
- Recognised as the junior agent with the most transfers in my first 30-day cycle

Internet Café Assistant / IT Support | Tokoos Studios (Pty) Ltd | *Oct 2022 – Apr 2023*

- Provided hands-on technical support for hardware and software issues, handled cash and inventory, documenting client problems and provided solutions, and designed marketing materials
- Delivered 24/7 client support and developed practical problem solving skills in a fast paced environment
